Ecosystem Style

Sustainable Community Management

Leveraging underutilized local resources to achieve integrated management of a decentralized, autonomous community

Assisting at every step of the process—from developing a vision through to turning it into reality

Support phase

Assist in defining a vision

Assist in running a project; operate or assist in operating an infrastructure

Fund-raising scheme

Utilize public funding (subsidies and grants) and reconsider regional financing arrangements

Business flow

- 1 Research available local resources
- Conduct a proofof-concept test to evaluate business feasibility
- Develop a plan and conduct research
- Invest in launching

 a business and develop an infrastructure
- Operate or assist in operation

Fragmented industries work together to transform the region into a sustainable community in a virtuous cycle.

Establish an infrastructure for resource circulation

Design solutions to optimize the entire process from collecting underutilized local resources to using recycled resources

Create an industry

Create an industry and jobs to bolster the local economy

Increase the value of the community

Assist in the process of enhancing the value of the community and communicating the value to a broad audience
